

WD-Assign2 – Internet Flowchart

Create a flowchart diagram that illustrates the concepts of how the Internet works. Make sure you include the following terms and a brief explanation with each item.

You must include: client, server, TCP/IP, routers, IP address, & DNS Server

You may use Photoshop, PowerPoint, Word, Illustrator or any other computer program you are comfortable with. If you would prefer, you can do it by hand (colors are expected).

If you choose to do this on computer, save your assignment as **firstnamelastname-WDassign2.(ext)** and place a copy in my assignments folder

If you do the assignment by hand, please hand the paper in at my desk.

WD-Assign2: Internet Flowchart

Student accurately explains all required terms in detail	/10
Flowchart demonstrates a clear understanding of the processes of the Internet	/10
Overall Impression of finished product (color, titles, diagrams, etc.)	/10
