

WD-Assign9 – Using Images In Web Pages

Download a new copy of the template and save it to your **XHTML folder** (in your documents folder) as ***firstnamelastname-WDassign9.html***

Create a page sample that describes includes images and information for your favourite television, movie and music celebrities.

1. You must use all proper image tag attributes (alt, height, width, align, vspace, hspace) and vary the alignment of photos throughout the document.
2. You must use css to decorate the page background with color, borders and padding.
3. You must use css to decorate the divs, heading and paragraphs tags for each celebrity with color, borders and padding.
4. You must use proper heading levels throughout your document to organize your information.
5. You must be detailed in your descriptions and have a minimum of 3 of each type of celebrity.
6. You must use line breaks to control wrapping on the page.
7. Bonus: can you figure out how to add a colorized border to each image using css?

WD-Assign9: Using Images in Web Pages

Student has shown a proper understanding image tag attributes	/10
Student has used CSS to change the background color and borders for the page, headings, divs and paragraphs to create a layered design	/5
Student has shown a proper understanding of using heading levels	/2
