

WD-Assign15 – School Profile Page

Our school principal has asked you to design a school profile page. You do not need to design an entire site, but rather a page that will showcase what our school has to offer. To receive full marks you must follow the process below:

- 1) Create a table layout and make sure it validates.
 - 2) Decorate the table using CSS Rules and CSS Class selectors in the head section.
- Use **CSS Rules** to decorate the following tags and then use them in the body section:
 - h1
 - h2
 - p
 - li
 - table
 - tr
 - td
 - Use **CSS Classes** to decorate
 - 2 div containers used somewhere on the page
 - 2 span containers used somewhere on the page

No graphics are required as the page is meant to provide information only, but they will go a long way for decorating your page.

You must be sure that users will be entertained with your design and color combinations. ***Try to choose colors that reflect our school culture and logo.***

3) Validate Your Code!

Save this file as ***firstnamelastname-WDAssign15.html*** and hand it in to my drop folder.

There is a diagram of the structure you should use on the next page.

WD-Assign15 Rubric– School Profile Page

XHTML Tag Selectors are defined for the following tags: /10

<h1> <h2> <p> <table><tr><td>

3 CSS Class Selectors are defined and used in the document /10

The document is visually appealing and the included information accurately reflects our school. /10

Code is well written, indented, commented and validates /5

Total /35
