

WD-Assign6 – Organizing Webpage Content

Download a new copy of the template and save it to your **XHTML folder** (in your documents folder) as ***firstnamelastname-WDassign6.html***

For this assignment, you will choose a topic that is important to you and you will create a webpage for this topic. You will design the page so that the information is organized like a textbook. In this webpage you must do the following:

1. Make sure to use proper heading levels to break up the sections and subsections. Content must make use of headings to the 4th level.
2. Include Horizontal Rules to separate your sections and modify them with attributes
3. Put all content information in paragraph tags and organize it to follow a natural order.
4. Use at least one example of emphasis, strong, subscript and superscript
5. Use the alignment attribute for all elements (heading, paragraphs, hr, etc)
6. You must have a minimum of 3 “chapters”

When finished, place a copy of this file in my drop-off folder.

WD-Assign6: Organizing Webpage Content

Title has been appropriately modified	/1
Headings have been used properly to the 4 th level	/5
