

WD-Assign6b – Validation

For this assignment you will go back to your first three xhtml assignments and use the validator to check them for accuracy.

1) In your documents folder, Create a folder and call it:

"firstnamelastname-WDAssign6b"

2) Copy the following files to this folder:

- **firstnamelastname-WDAssign5.html**
- **firstnamelastname-WDAssign6.html**
- **firstnamelastname-WDAssign6a.html**

3) Validate all three files and fix all errors until the document is validated (green). Then save the files to this folder.

When finished, place a copy of the **entire folder** in my drop-off folder.

WD-Assign6b: Validation Rubric

All three files have been validated and there are no remaining errors. /10

Total /10
